Leverage Enterprise-Friendly Features and Set up Your Distributed Environment

- † High availability and automatic VPN initialization
- † Load balancing and the ability to leverage multiple Internet service providers
- † Token-based authentication available
- † A complete UTM appliance that provides web filtering, mail filtering, intrusion detection and prevention, anti-malware, anti-virus, and more
- † Secure remote VPN access for your mobile staff

SG310 The McAfee UTM Firewall SG310 is a compact, feature-rich network security appliance that is perfect for securing small networks and remote workers. The onboard 4-port 10/100 Ethernet switch and serial ports connect the network to the Internet via broadband (ADSL, cable, SHDSL, and others) or narrowband (modem and ISDN) connections.

SG560 and SG560U For slightly larger offices where higher performance is needed, the McAfee UTM Firewall SG560 includes all the features of the SG310 plus a robust metal case, hardware encryption acceleration for better VPN performance, and port-based VLAN capability that offers up to five separate security zones. The SG560U includes a USB port to provide a low cost 3G wireless connectivity option.

SG565 With the adoption of wireless LANs (WLANs), organizations of all sizes benefit from the ability to access information when away from a desk. The McAfee UTM Firewall SG565 extends the capabilities of the SG560 to include 802.11b/g WLAN support and two USB host ports. USB ports allow you to expand on-board storage, or even provide 3G network access through USB 3G wireless modems either as a primary connection or a high-availability option. The SG565 also offers IDS/IPS, and web caching.

SG580 The McAfee UTM Firewall SG580 consolidates firewall, intrusion prevention, and secure VPN access. Its networking capabilities enable small offices and branch offices of large enterprises to safely and easily connect their networks of PCs, PDAs, web and application servers to the Internet via broadband circuits from T-1 to T-3 and xDSL, or narrowband connections (modem and ISDN). Includes up to five separate security zones, link failover and Internet session load balancing, and built-in web proxy cache.

McAfee UTM Firewall SG560 and SG560U are designed for slightly larger offices where higher performance is needed. The SG560 includes all the features of the SG310 plus a robust metal case, hardware encryption acceleration for better VPN performance, and port-based VLAN capability that offers up to five separate security zones. The SG560U includes a USB port to provide a low cost 3G wireless connectivity option.

Create A Secure Distributed Office Environment with McAfee UTM Firewall

McAfee UTM Firewall SG560 and SG560U are designed for slightly larger offices where higher performance is needed. The SG560 includes all the features of the SG310 plus a robust metal case, hardware encryption acceleration for better VPN performance, and port-based VLAN capability that offers up to five separate security zones. McAfee UTM Firewall Family Benefits, Features, and Advantages

Enterprise-class

McAfee UTM Firewall SG560 and SG560U are designed for slightly larger offices where higher performance is needed. The SG560 includes all the features of the SG310 plus a robust metal case, hardware encryption acceleration for better VPN performance, and port-based VLAN capability that offers up to five separate security zones. The SG560U includes a USB port to provide a low cost 3G wireless connectivity option.

McAfee UTM Firewall SG560 and SG560U are designed for slightly larger offices where higher performance is needed. The SG560 includes all the features of the SG310 plus a robust metal case, hardware encryption acceleration for better VPN performance, and port-based VLAN capability that offers up to five separate security zones. The SG560U includes a USB port to provide a low cost 3G wireless connectivity option.

Failover and Load Balancing

McAfee UTM Firewall SG560 and SG560U are designed for slightly larger offices where higher performance is needed. The SG560 includes all the features of the SG310 plus a robust metal case, hardware encryption acceleration for better VPN performance, and port-based VLAN capability that offers up to five separate security zones. The SG560U includes a USB port to provide a low cost 3G wireless connectivity option.

Virtual Private Network (VPN)

McAfee UTM Firewall SG560 and SG560U are designed for slightly larger offices where higher performance is needed. The SG560 includes all the features of the SG310 plus a robust metal case, hardware encryption acceleration for better VPN performance, and port-based VLAN capability that offers up to five separate security zones. The SG560U includes a USB port to provide a low cost 3G wireless connectivity option.
