

# McAfee VirusScan Mobile Enterprise Edition

## Proven Security on the go.

**Mobile devices provide an organization with increased productivity, better data access and more efficient operations. Coupled with the increased functionality, however, is an increased risk of unauthorized access to important corporate data. With malware targeting mobile devices growing faster than it did in the early days of the PC, mobile security should be a part of any mobility deployment.**

Comprehensive mobile protection is essential to protect data integrity and employee productivity from malware attacks as well as to meet compliance requirements for data access and protection. McAfee® provides a mobile security solution that protects enterprise networks and employees' mobile devices as well as secures corporate information.

McAfee Mobile Security is a platform designed, architected and implemented specifically for the mobile environment. McAfee VirusScan® Mobile is the flagship product in the security platform, which provides enterprises with the opportunity to deploy McAfee VirusScan Mobile pre-installed on devices or as an aftermarket product downloaded to enterprise devices already in the field.

## Be smart. Secure your workforce.

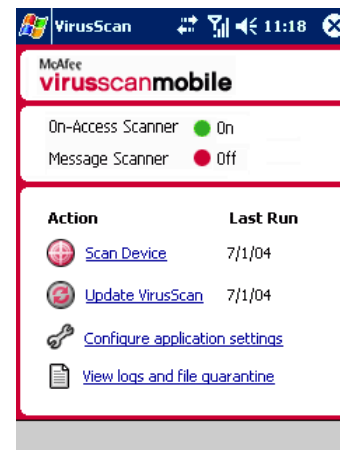

McAfee VirusScan Mobile Enterprise Edition provides advanced scanning, detection and cleaning of mobile data to prevent corruption due to viruses, worms, dialers, Trojans, battery-sapping malware, and other malicious code.

**Pre-Install VirusScan directly on new devices.** By pre-installing, employees are provided with the security software they need to prevent malware. Easily deploy mobility knowing employees are safe and secure and that corporate data is protected.

**Aftermarket product for employee-owned or deployed devices.** VirusScan Mobile is available for employees to download directly to devices in the field. Offer employees the download directly from the corporate intranet, or from the McAfee website.

## Proven Security for Enhanced Mobility.

McAfee VirusScan Mobile is designed to provide comprehensive protection at all points of potential exposure. Inbound email, outbound email and Internet downloads are all protected with on-access and on-demand scanning.

McAfee VirusScan Mobile protects your device from malware.

McAfee VirusScan Mobile Enterprise Edition offers enterprises comprehensive protection against threats that can result in productivity or information loss, or legal liability.

- **Safeguard corporate assets.** Keep confidential information safe and avoid potential theft of vital data from virus infections or other intrusions.
- **Keep employees productive.** Viruses and other threats can interrupt mobile service and disrupt business communications. Secure corporate cell phones, so that employees stay productive-and business runs smoothly.
- **Meet compliance requirements.** Current legislation demands that enterprises protect sensitive corporate data. The McAfee mobile security solution helps enterprises stay compliant.

## Comprehensive and silent security.

McAfee VirusScan Mobile automatically secures devices; it scans and cleans files, e-mails, Internet downloads, text messages and attachments.

- Always-on protection identifies and removes viruses, Trojans, worms and other malicious applications without interrupting connections.
- It detects at multiple entry and exit points, including e-mail, instant message attachments, Internet downloads, SMS, MMS, WiFi and Bluetooth.
- Inline cleaning automatically cleans infections when viruses, worms, Trojans or other threats are found.
- Mobile-based technology prevents new threats like the “CommWarrior” virus.

McAfee, Inc. is the pioneer and leading provider of subscription security services. McAfee VirusScan Mobile offers subscribers have access to all updates providing immediate protection against newly discovered viruses. Other advantages include:

- **Flexible design for devices.** Each VirusScan Mobile version is designed for the phone operating system in which it is installed.
- **Minimal Device Impact.** McAfee VirusScan Mobile is designed to never have more than a 200 millisecond impact. McAfee VirusScan Mobile is fast and has low CPU usage.
- **Small footprint.** VirusScan Mobile has the smallest installation and run-time requirements. The embedded version uses just 500 kilobytes of space on a device.
- **Unrivaled research center.** Backed by the AVERT<sup>®</sup> team (Anti-Virus and Vulnerability Emergency Response Team); the top ranked anti-virus research center in the world.
