

ForeScout Test Drive Experience

Experience the Difference of Agentless Visibility and Control

Here's your chance to put ForeScout CounterACT[®] through its paces. During your three-hour test drive, the ForeScout crew will spin up virtual CounterACT sessions and take you through five real-world use cases, so you can experience life before and after using the product.

Lap One: Drive Security with In-Depth Visibility

Real-time visibility fuels every aspect of cybersecurity. Experience the before-and-after difference of continuous discovery and monitoring in these two scenarios.

Scenario One: Asset Management. Gain visibility of hardware and software that you didn't know you had for an annual software audit—without pulling resources from other critical tasks.

Scenario Two: Endpoint Compliance. Use advanced visibility to streamline a security audit as you quickly determine whether networked devices are running up-to-date security software—without all the extra effort.

Lap Two: Put the ForeScout Policy Engine Through Its Paces

Experience the difference policy-based control makes in keeping your team informed, automating compliance enforcement and addressing ransomware.

Scenario Three: Continuous Monitoring. Create and apply a policy that notifies you of out-of-compliance hosts and confirms that systems are restored to compliance—without you having to do all the work.

Scenario Four: Advanced Compliance (WannaCry and EternalBlue). Respond to a WannaCry outbreak by using an automated policy to quickly locate vulnerable hosts and determine which need to be patched and which are infected instead of the complex process most enterprises use today.

The Course Layout

We're going to cover a lot of ground during your test drive. Here's how your three-hour experience will unfold:

Arrivals and Welcome
(first 15 minutes)

Course Briefing—Includes Food and Beverage
(45 minutes)

Test Drive Experience
(2 hours)

Tune Your ROI

Want to see ForeScout's impact on your bottom line? Spend 10 minutes with the ForeScout Business Value ROI Tool (based on IDC's Business Value Methodology) to run your organization's numbers and share a personalized report with your team.

Visit www.forescout.com for your custom ForeScout ROI report.

Check Your Network's Blind Spots

Hidden devices are lurking around every turn—and they're hiding on your network. Let ForeScout flag unknown devices with a detailed assessment of your network endpoints, including infrastructure and rogue systems as well as BYOD, IoT and OT devices. Sign up for a complimentary Visibility Assessment at www.forescout.com/demo.

Lap Three: Make Third-Party Tools Fire on All Cylinders

Without heterogeneous support and multivendor orchestration, you're left spinning your wheels trying to manually respond to security issues. During this lap, you'll experience two ways to automate network segmentation, including how to easily create a policy that shares CounterACT information with leading next-generation firewalls (NGFWs).

Scenario Five: Network Segmentation. Enforce changes to your company's antivirus policy. As a result of the WannaCry outbreak, you must quickly remove endpoints that aren't running up-to-date antivirus software from your network. Once CounterACT assesses endpoints, it can restrict, block or quarantine non-compliant devices using its Virtual Firewall feature. Or, if you're looking to maximize your firewall investment, CounterACT can tag non-compliant systems and automatically share this information with Palo Alto Networks or other NGFWs to quickly take action.

Who Should Attend:

Desktop Engineers

Desktop or Help Desk Managers

IT Analysts

IT Managers

Network Architects

Network Engineers

Systems Engineers

Systems Engineer Managers

Security Operations Analysts

Security Operations Managers

(ISC)² CPE Credits Available

(ISC)² members who attend ForeScout's Test Drive Experience qualify for up to three continuing professional education credits. Please provide your (ISC)² membership number when you register.

Please note: this is a technical, hands-on session where you will operate ForeScout CounterACT with an on-site ForeScout Expert coaching you through best-practice policy creation and deployment. You must bring your own Windows®, Linux® or Mac laptop, and Google Chrome™ or Mozilla Firefox® are the recommended web browsers.
